## ABSTRACT

### Online Home-made snacks and sweets delivery

The idea behind this website is to deliver home-made snacks, sweets and pickles. Many of us are fond of sweets and snacks, in this busy world we usually buy them from stalls. We know that always home-made food is healthy and most importantly highly hygiene. At home we cook food with at most care.

A simple website is created for delivering the food which is ordered by the respective customers or user. The following languages are used in building this website.

The front-end language used are:

->html

->css

Front-end framework used is :

- \* Bootstrap

The back-end framework used is:

- \* Django
